land cover and land use where natural and semi-natural vegetation are described in terms of land cover, agricultural and urban areas in terms of land use, and, in particular, the definition of forests is a combination on land cover and land use.

### **Land Use Classification - United Nations**

The base of a land information system is a uniform spatial referencing system for the data in the system which also facilitates the linking of data and within the system with other land related data. A land information system for state administration on land is expected to consist of the following components. Geospatial data

Land Tenure Christopher Udry Farming in sub-Saharan Africa outside South Africa typically takes place on small plots cultivated by individuals. The land tenure system is often described as "communal", meaning that land is owned by a kin-based or political group and that individuals obtain the right to cultivate through their membership in that group.

### **Land Tenure - Yale University**

Early Land Systems Terminus was the god of boundaries. The stones used to mark borders were sacred to him. In February Terminalia was celebrated by the Romans. The stone or stump boundary markers were drenched in sacrificial blood and placed on flowers to

and customs, the land tenure system constitutes a means of administrative control of socio-political life of the community. Another operational definition of land tenure as conceived by Timmons (1943) is that land tenure is the relationship between individuals, and between individuals and society, growing out of the use of land.

A LAND USE AND LAND COVER CLASSIFICATION SYSTEM FOR USE WITH REMOTE SENSOR DATA  
By JAMES R. ANDERSON, ERNEST E. HARDY, JOHN T. ROACH, and RICHARD E. WITMER ABSTRACT  
The framework of a national land use and land cover classification system is presented for use with remote sensor data.

systems, namely, the Imperial, the Derg, and current governments. The present study is a modest attempt to fill the existing research gap by documenting the role of politics in determining land tenure systems and its

effects in the South ,which, for historical reasons , deserves special attention.

## **THE POLITICS OF LAND TENURE IN ETHIOPIAN HISTORY**

The ingredients of land administration systems (LAS) and the reasons for building and reforming LAS are explored. The differences between land administration and land reform are emphasized, as is the central role of good governance in building and operating successful LAS.

and land degradation are also occurring. The condition of the soil is one of the best indicators of land degradation. The soil integrates a variety of important processes involving vegetation growth, overland flow of water, infiltration, land use and land management. Soil degradation is, in itself, an indicator of land degradation. But, in the ...

1.1.1.1 Systems of Land Ownership . The system of land ownership regulates the relationship of the people to the land, specifically the power of disposition over land and the right to use the land.

### **Systems of Land Ownership - Professor Frithjof Kuhnen**

2 LAND ADMINISTRATION SYSTEMS Land Administration Systems (LAS) are an important infrastructure, which facilitate the implementation of land policies in both developed and developing countries. LAS are concerned with the social, legal, economic and technical framework within which land managers and administrators must operate.
