6 Introductory Lectures on Stochastic Optimization and by inspection, a function is convex if and only if its epigraph is a convex set. A convex function is closed if its epigraph is a closed set; continuous convex functions are always closed. We will assume throughout that any convex function we deal with is closed.

a translation of Part II of the lectures, partly from Benard's French, and partly from Hotho's second edition. His work is not to be despised. In 1905 Bosanquet published a translation of Hegel's Introduction, superseding a partial translation by W. Hastie (1886). This is a model translation of Hegel and it has valuable footnotes.
