Overcoming Patient-Provider Communication Barriers in

Test Purpose The FCP-R lets you account for some of the unique aspects of communication and the diversity among individuals with developmental and acquired delays. It addresses all communication possibilities and is not limited to oral language expression. Test items help fulfill the standards in state and federal regulations in the United States.

Functional Communication Profile Revised (FCP-R) By Larry

Augmentative and alternative communication is typically much slower than speech, with users generally producing 8-10 words per minute. Rate enhancement strategies can increase the user's rate of output to around 12-15 words per minute, and as a result enhance the efficiency of communication. In any given SGD there may be a large number of vocal expressions that facilitate efficient and ...

Program Information. The Communication Science & Disorders Speech-Language Pathology Prerequisite (Bridge) Program offers a -bridge- to graduate training programs in speech-language pathology.

Speech-Language Pathology Prerequisites (Bridge) Program

Spasmodic dysphonia is a neurological disorder affecting the voice muscles in the larynx, or voice box. When we speak, air from the lungs is pushed between two elastic structures called vocal folds or vocal cords with sufficient pressure to cause them to vibrate, producing voice (see figure). In spasmodic dysphonia, the muscles inside the vocal folds experience sudden involuntary movements ...

The success of assistive communication devices and strategies. A variety of assistive communication devices and strategies have proven successful in assisting many children to develop methods of communicating and even developing speech. These devices are usually prescribed by a speech-language pathologist and are a part of augmentative and alternative communication interventions (AAC).
