Section 11: Epidemic Disease Occurrence Level of disease. The amount of a particular disease that is usually present in a community is referred to as the baseline or endemic level of the disease. This level is not necessarily the desired level, which may in fact be zero, but rather is the observed level.

Principles of Epidemiology | Lesson 1 - Section 11

Behavior change, in the context of public health, refers to efforts to change people's personal habits to prevent disease. Behavior change in public health is also known as social and behavior change communication (SBCC). More and more, efforts focus on prevention of disease to save healthcare care costs. This is particularly important in low and middle income countries, where health ...
