The 2014 State of the Birds assesses the health of our nation's bird populations through a set of habitat indicators, a Watch List of species most vulnerable to extinction, and a list of the Common

The State of the Birds 2014

The first classification of birds was developed by Francis Willughby and John Ray in their 1676 volume *Ornithologiae*. Carl Linnaeus modified that work in 1758 to devise the taxonomic classification system currently in use. Birds are categorised as the biological class Aves in Linnaean taxonomy. Phylogenetic taxonomy places Aves in the dinosaur clade Theropoda.

Birds Protected Under the Federal Migratory Bird Treaty Act

Below is a list of U.S. state birds as designated by each state's legislature. The list also contains U.S. territory birds as designated by each territory's legislature, as well as the District of Columbia's bird. The selection of state birds began in 1927, when the legislatures for Alabama, Florida, Maine, Missouri, Oregon, Texas and Wyoming selected their state birds.

List of U.S. state birds - Wikipedia

A plain brown bird with an effervescent voice, the House Wren is a common backyard bird over nearly the entire Western Hemisphere. Listen for its rush-and-jumble song in summer and you'll find this species zipping through shrubs and low tree branches, snatching at insects. House Wrens will gladly use nestboxes, or you may find their twig-filled nests in old cans, boots, or boxes lying around ...
