Probability and Mathematical Statistics 1 Chapter 1 PROBABILITY OF EVENTS 1.1. Introduction During his lecture in 1929, Bertrand Russel said, "Probability is the most important concept in modern science, especially as nobody has the slightest notion what it means." Most people have some vague ideas about what probability of an event means.

Since the total area of the square is 1, the probability of the point falling in a specific subset E of the unit square should be equal to its area. Thus, we can estimate the area of any subset of the unit square by estimating the probability that a point chosen at random from this square falls in the subset.

Data is typically displayed in the form 1:2 9 0227779 which in this case means, that the stem is 1:2, and the following values are included in the sample: 1:20 once, 1:22 twice, 1:27 thrice and 1:29 once (1:21 for example isn't included). The leaves may be written in multiple rows due to space issues. Example.
