

new human growth hormone pdf

Growth hormone (GH) or somatotropin, also known as human growth hormone (hGH or HGH) in its human form, is a peptide hormone that stimulates growth, cell reproduction, and cell regeneration in humans and other animals. It is thus important in human development. It is a type of mitogen which is specific only to certain kinds of cells. Growth hormone is a 191-amino acid, single-chain polypeptide ...

Growth hormone - Wikipedia

Growth hormone therapy refers to the use of growth hormone (GH) as a prescription medication—it is one form of hormone therapy. Growth hormone is a peptide hormone secreted by the pituitary gland that stimulates growth and cell reproduction. In the past, growth hormone was extracted from human pituitary glands. Growth hormone is now produced by recombinant DNA technology and is prescribed for ...

HER2 is short for the human epidermal growth factor receptor 2. (It is also known as ERBB2). In some cancers, especially breast cancer or cancers of the stomach and esophagus (gastroesophageal), the tumor cells have extra copies of the gene and excess amounts of the protein that it produces. Tumors in this category are known as HER2-positive and can be more aggressive and respond differently ...
