### **Selected Topics in Nanoscience and Nanotechnology**

The research and development of nanotechnology is very active globally, and nanotechnologies are already used in hundreds of products, including sunscreens, cosmetics, textiles, and sports equipment. Nanotechnology is also being developed for use in drug delivery, biosensors, and other biomedical applications. Further, nanotechnologies are also being developed for use in environmental applications, e.g., clean-up of environmental pollutants.

### **Nanotechnology - an overview | ScienceDirect Topics**

The development of nanotechnology depends on the ability to build and maneuver structures at the scale of 10-100 nanometers (nm). Traditionally, engineers have fabricated nanometer-sized structures through a "top-down" approach by "carving them out" via lithography from a large substrate.
