UPSC Mathematics Syllabus 2019 Math Optional Subject (IAS)

In mathematics, the Fréchet derivative is a derivative defined on Banach spaces. Named after Maurice Fréchet, it is commonly used to generalize the derivative of a real-valued function of a single real variable to the case of a vector-valued function of multiple real variables, and to define the functional derivative used widely in the calculus of variations.

In mathematical analysis, the Minkowski inequality establishes that the L^p spaces are normed vector spaces. Let S be a measure space, let $1 \leq p < \infty$ and let f and g be elements of $L^p(S)$. Then $f + g$ is in $L^p(S)$, and we have the triangle inequality $\|f + g\|_p \leq \|f\|_p + \|g\|_p$ with equality for $1 < p < \infty$ if and only if f and g are positively linearly dependent, i.e., $f = \lambda g$ for ...

En mathématiques, l'inégalité de Minkowski, ainsi nommée en l'honneur de Hermann Minkowski, est l'inégalité triangulaire pour la norme des espaces L^p pour $p \geq 1$, établissant ainsi que ce sont des espaces vectoriels normés. Elle concerne également la norme des espaces de suites ℓ^p
