It has happened, Zombies have appeared. They are beginning to take over large urban centers. In just a matter of weeks, several cities have been completely disabled. You are a disease researcher with the Centers for Disease Control & Prevention (CDC). Despite the CDC's Zombie Preparedness campaign, an effective strategy for dealing with the rapidly developing Zombie outbreak has still not been established.

Attack Bonus: +3 Armor Class (AC): 14 Hit points refer to how many hits from zombies the survivors can take before they die. Attack Bonus is the number added to an attack roll to determine if a survivor hits a zombie. Armor Class is the number a zombie must roll (with their attack bonus) to hit a survivor.

of zombies, the computational power needed by such simulations would soon get out of hand, even when we are not running for our lives. Instead, we consider the case where the number of zombies is initially large. This produces a continuous model of diffusion that is much easier to use, as it needs less computational power and analytical solutions are available (see Section 6.4).
